RA releases its review of BELCO's North Power Station

July 22, 2022, Hamilton, Bermuda: Following the island-wide power outage in December 2020, the RA has completed its review of the incident at the BELCO North Power Station and has today released its findings.

The extensive technical reviews, which included numerous rounds of assessments and independent reviews between the BELCO and RA, identified several **critical deficiencies** which contributed to the outage. Numerous improvements and recommendations have been made to BELCO, including a review of the entire new North Power Station commissioning process.
