

Dr. Rodney Croft

**Professor of Health Psychology
School of Psychology, University of Wollongong
Australia**

Dr. Rodney Croft is Professor of Health Psychology at the School of Psychology, University of Wollongong, Australia. He obtained degrees in Philosophy and Psychology before completing his PhD in Psychology at the University of Wollongong in 2000, and then worked in the area of cognitive neuroscience as a postdoc at Imperial College, London, and then at Swinburne University, Australia.

Dr. Croft's research focuses on the delineation of human brain function, particularly as it relates to agents that might affect it (e.g. electromagnetic fields, illicit and medicinal drugs), as well as psychiatry more generally. He has been involved in research on extremely low frequency (ELF) and Radio Frequency (RF) non-ionising radiation since 2000, primarily utilising the electroencephalogram as a means of observing subtle alterations in brain function.

He participates in a variety of national and international scientific and government committees, was Executive Director of the Australian Centre for Radiofrequency Bioeffects Research (2004-2011) and is currently Director of the Australian Centre for Electromagnetic Bioeffects Research. Dr. Croft was appointed in 2014 an Associate Editor of the Bioelectromagnetics (BEMS) Journal, and joined the International Commission on Non-Ionizing Radiation Protection (ICNIRP) Biology Standing Committee in 2008 and Main Commission in 2012. Rodney Croft is the ICNIRP Chair, since May 2020.
